

Special produced webbing to be used in in the poultry farming sector, designed for the collection of eggs in farms.

since 1828

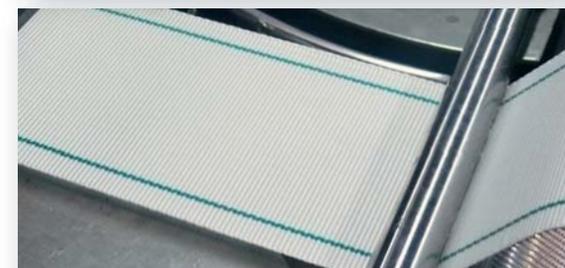

# EGG COLLECTING CONVEYOR BELT

**EXTREMELY LOW ELONGATION • VERY HIGH TENACITY • CONSTANT WIDTH**

The main characteristics are:

- 100% High Tenacity (HT) Polypropylene
- Does not absorb dirt
- Very easy to clean even if when one egg is broken in the conveyor  
Perfect for a cold washing processes, with pressure hoses
- Does not absorb liquids. There is no retained humidity
- Very easy to do the end unions
- Very good "grip" over the pulling rollers
- Anti-slip, good product fastening
- Less static electricity than PES and PE (very important in applications where there is friction with other materials)
- High resistance to most chemical agents, resistant to organic solvents, aqueous solutions of acids, bases and salts
- 100% recyclable
- High resistance to abrasion (longer life for products)
- Light density: Light product
- Does not absorb dirt and does not fade

**ROLLS LENGTH AT CUSTOMER REQUEST.**
